Accordion

An accordion groups collapsible sections and shows one section at a time. It is a wrapper around `[bsv-accordion-item]` shortcodes.

Accordion example

Example

```
[bsv-accordion id="my-accordion"]
[bsv-accordion-item title="First section" show="yes"]First content.[/bsv-accordion-item]
[bsv-accordion-item title="Second section"]Second content.[/bsv-accordion-item]
[/bsv-accordion]
```

Format

```
[bsv-accordion id=""]items here[/bsv-accordion]
```

Parameters

Parameter	Description	Default
`id`	Optional element ID. When empty, a unique `bsv-accordion-N` ID is generated.	*generated*

The accordion uses real `<button>` controls with `aria-expanded` and `aria-controls`, one open item at a time, and ArrowUp/ArrowDown/Home/End keyboard navigation. The panel content remains readable when JavaScript is unavailable.
