Button Group

A wrapper that displays several `[bsv-button]` shortcodes as one unit.

For the border radius to join correctly, do not put line breaks between the button shortcodes.

Button group example

Example

```
[bsv-button-group][bsv-button]1[/bsv-button][bsv-button]2[/bsv-button][bsv-button]3[/bsv-button][/bsv-button-group]
```

Format

```
[bsv-button-group styles=""]your bsv-button shortcodes here[/bsv-button-group]
```

Parameters

Parameter	Description	Default
`styles`	Optional inline CSS. Only a safe allowlist of layout and color declarations is kept; values with quotes, URLs or expressions are removed.	*empty*

The group renders with `role="group"` and the `bsv-btn-group` class.
