Table Wrap

Wraps existing table markup in a responsive container without adding table classes. Use `[bsv-table]` when you want the Bootstrap table styles as well.

Name	Value
Alpha	1
Beta	2

Responsive table wrapper example

Example

```
[bsv-table-wrap]<table>...</table>[/bsv-table-wrap]
```

Format

```
[bsv-table-wrap parameter="value" ...]<table>...</table>[/bsv-table-wrap]
```

Parameters

Parameter	Description	Default
`responsive`	Wrap the content in a responsive container: `yes` or `no`.	`yes`

The content is passed through `wp_kses_post`.
