Sample Display
C Major
E A D G B E
This sample updates when you change the chord diagram settings.
Background Color
Select Color
Background color of the chord diagram. Use none or leave empty for transparent.
Barre Border Radius
0.25
Border radius of a barre relative to the nut size.
Barre Bar Stroke Color
Select Color
Stroke color of a barre. Leave empty to use the nut color.
Barre Bar Stroke Width
0
Stroke width of a barre in pixels.
Canvas Width
180
Width of chord diagrams in pixels. The height is adjusted automatically.
Global Color
Select Color
Global color of the chord chart. More specific colors override this value.
Empty String Indicator Size
0.6
Size of the X and O indicators relative to the string spacing.
Fixed Diagram Position
Yes
Keep the distance between the diagram and the top of the SVG constant, whether a title is shown or not.
Font Family
Arial, "Helvetica Neue", Helvetica, sans-serif
Font family used for letters and numbers in chord diagrams.
Fret Color
Select Color
Fret color. Leave empty to use the global color.
Fret Label Color
Select Color
Fret label color. Leave empty to use the global color.
Fret Label Position
Right
Position of the fret label.
Fret Label Font Size
38
Font size of the fret label.
Frets
4
Number of frets to show in the chart.
Fret Height
1.5
Height of a fret relative to the string spacing.
Nut Size
0.85
Size of a nut relative to the string spacing.

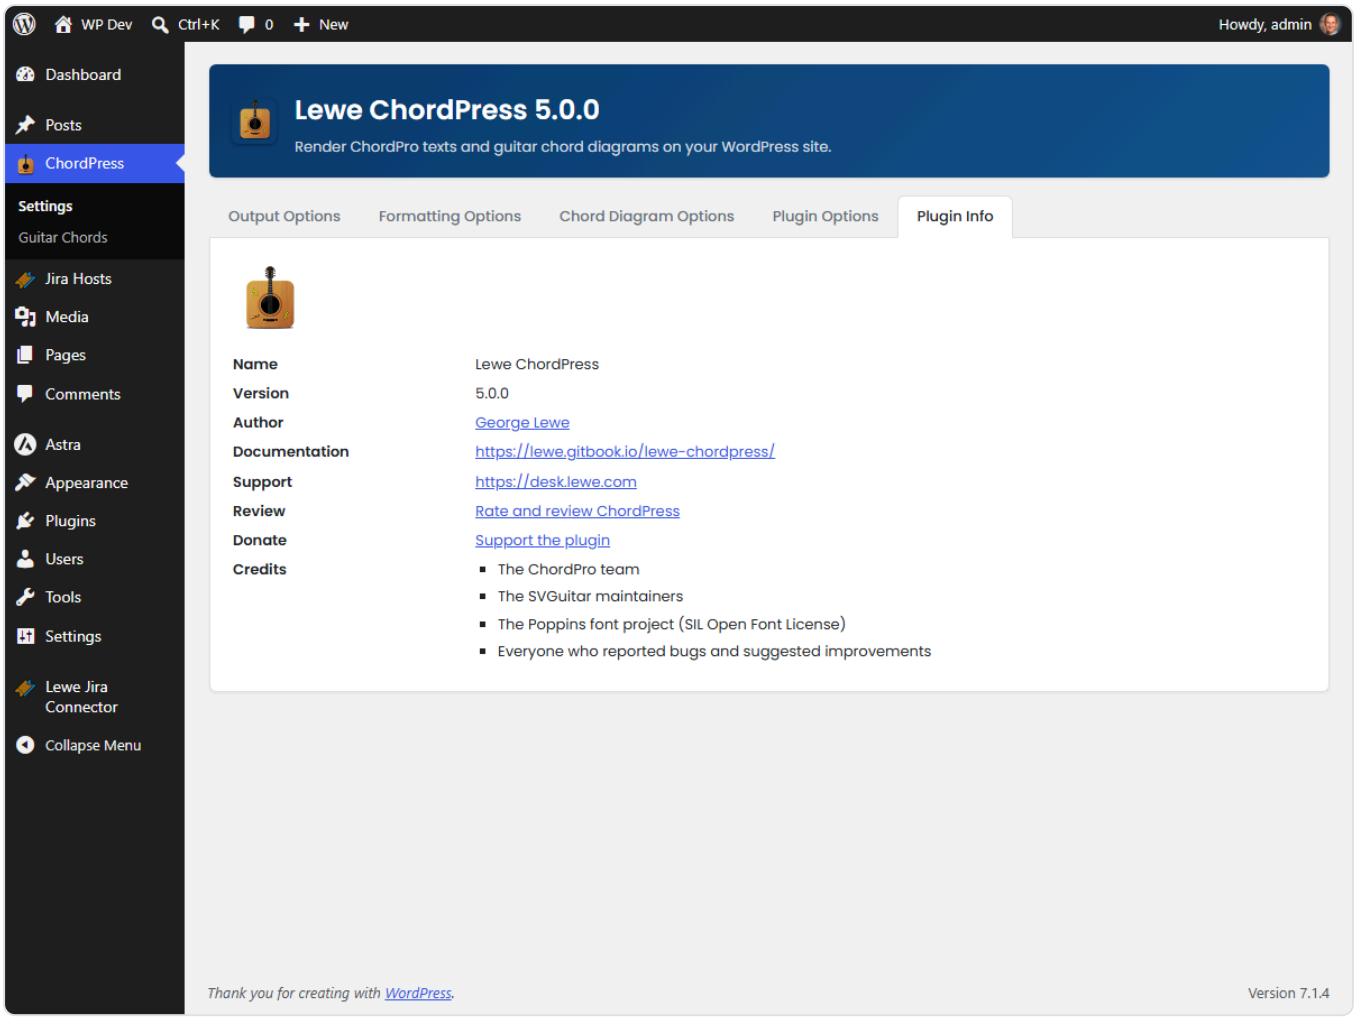

Each option is labelled with an explanation of what it is for.

Plugin Options

This tab allows to set general plugin options.

Plugin Info

This tab shows information about ChordPress and how to access the documentation and support.
