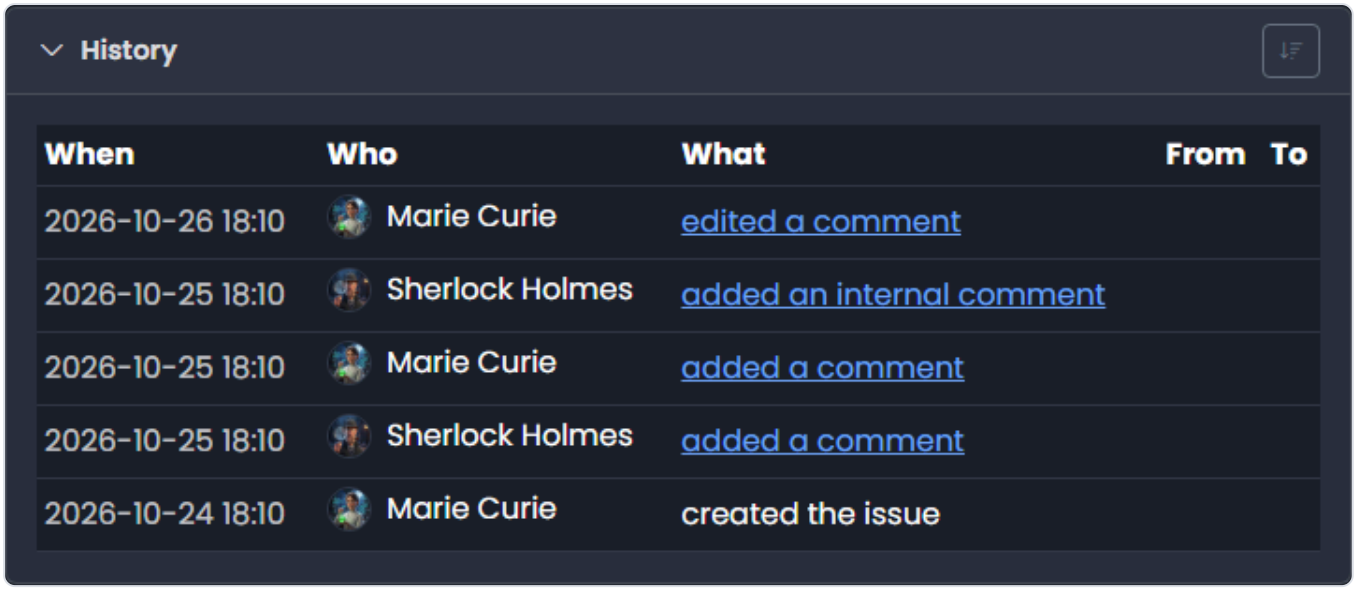
History



The **History** panel at the bottom of an issue records who changed what and when. Click the title to expand or collapse it.

Columns

Column	Description
When	Date and time of the change
Who	The user who made the change
What	What happened, e.g. *changed Status* or *added a comment*
From	The previous value
To	The new value

Click the sort icon to switch between newest first and oldest first.

What is recorded

- creating, deleting and restoring the issue

- changes to type, priority, status, resolution, assignee, access, summary, description, product, issue key, affected version, fixed version and tags (a move is recorded with the old and the new key)
- comments added, edited and deleted (internal comments are only visible to the support team)
- attachments added and deleted
